Palliser Airshed Society - August 2014 Summary Report

Passive Sampling Results

Monthly Update

*All data has been slope, intercept, and baseline corrected. Data may change after validation process.

*The measured ambient concentrations of all parameters are within the AAAQO.

*All compliance parameters are above 90% operational. There are no operational issues to report.

*Passive site 10 recorded a high SO₂ value that is inconsistent with historical averages. This value was verified with the analytical lab, and has been flagged as an "exceptional event".
